

External Ozone Faucet

Specifications

- Ozone injector to fit on existing faucet
- Includes LED indicator and ozone switch
- Auto turn-on for instant ozonized water
- 100mg Corona Discharge ozone generator
- Ozone concentration in water: 0.5 ppm in air: 0.03 ppm
- Kit includes Universal power pack (NZ/AUS style)
- Ozone delivery hose
- Check valve

Brought to you by

HIGHLIGHTS

- Clean, fresh, great tasting water
- Kills 99% of all bacteria and viruses at the source
- Good for the environment
- Well looked after machine will last many years
- Easy to install to make ozone on demand

ENVIRONMENTALLY FRIENDLY

There are no harmful chemical by products and improves the taste of your water. Ozone oxidises chemicals like chlorine to limit their effects. It is safe, healthy and completely natural. You will have smelt ozone after a lightning storm when the air is crisp and fresh.

HOW TO USE OZONE

The uses for the ozone faucet are limitless. Food preparation is the main use to remove pesticides and bacteria from vegetables, meats and seafood so it is safe and lasts longer. Use it at home to wash dishes, clean bathrooms, mop the floor and wash clothes.

ADVANTAGES

Save Power, Save Water, Save Sanitizer, Save Time. A 10 second rinse can kill over 99% of bacteria and 80% of pesticides on the surfaces of vegetables and fruits. Reduce the use of chemical sanitizers, save water and use less time.

OZONE IS BEST

Research shows that alternatives to disinfecting water for personal use are toxic to humans. These alternatives are chlorine and antibacterial soap. While they have different uses they are both used to kill bacteria, prevent disease from spreading and keep your environment clean.

QUICKLY PAYS FOR ITSELF

Many household cleaners like antibacterial soap or floor disinfectants are no longer needed. Your fresh produce lasts longer as you kill the bacteria by soaking in ozone water for 20 seconds that would otherwise cause bacteria and mould to grow.

Our mission at Novozone is to bring to market safe eco-friendly water purifying solutions. With over 15 years of experience in producing ozone applications we also produce the best ozone products so you can benefit from our expertise.
